Legislature Prepares to Adjourn "Sine Die" Close of 1st Regular Session of the 59th Legislature Expected this Week

Senate Water	6
Senate Energy	6-7
Appropriations	7
Of Other Interest	8

Most committees have adjourned subject to the call of the chair while those still meeting are wrapping up their business. Second and third reading calendars are full as the last pieces of legislation and budget appropriations work their way through the House and Senate. Leadership is publicly predicting that the session can be completed by Friday, March 23rd, barring any unexpected issues.

The House suspended its rules on Friday to pass the proposed \$850,000 for the Eastern Snake Plain Aquifer Management Plan Framework and forward it to the Senate. The measure passed the House 65-0 with 5 absent and excused. (*See House Bill 320/page 7*)

At this time, it appears that the Governor's Water Summit will be held in conjunction with the next ESPA Framework meeting. That meeting is most likely to be scheduled in mid- to late-April.

As legislators begin packing to return home, two legislative interim committees are approved to meet over the summer. The Legislative Interim Natural Resource Committee will consider water issues, including HO290. Introduced late in the session, HO290 would expand and fund aquifer management beyond the ESPA to include any aquifer in the state. Legislators outside the ESPA are now beginning to understand that the problems created by competing uses, increased demand, and population growth will not be unique or isolated to eastern Idaho or any one aquifer system.

The Legislative Interim Energy Committee will continue its work to implement the state's newly adopted State Energy Plan. Among the issues that could come before the interim committee, siting remains controversial. The Plan currently recommends that siting decisions remain in the hands of local government with an option to request technical assistance from various state agencies. Opponents continue to question the wisdom of that policy decision.

The Idaho Water Resource Board met on Friday to select members of the ESPA Advisory Committee from the nominations submitted by various stakeholder groups. The process was contentious and is being reviewed in the Governor's office.
